Maximal Characterizat on and Series Function of Hardy-Sobolev spaces with an Applicati on Manifolds

Let M be a complete, non-compact Riemannian manifold, provided with a doubling measure μ . In this paper we compared the maximal Hardy-Sobolev spaces with the Hajlasz Sobolev space on M , and we showed that they can be identified under the assumption of a Poincaré inequality. The proof was based on a characterization of L_p on metric-measure spaces.
Key words: Hardy-Sobolev space, Hajlasz-Sobolev space, metric measure spaces.
